Static Control Lennite®

(static control UHMW-PE)

LENNITE® CN-P (Conductive Ultra-High Molecular Weight Polyethylene) Carbon-powder-filled, self-lubricating, conductive material with excellent abrasion-resistance and high impact strength. This material is lightweight and easily machined, has good chemical and stress-crack resistance, and good wear-resistance.

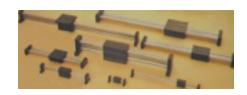

LENNITE® SD-P (Static-dissipative Ultra-High Molecular Weight Polyethylene) Carbon-powder-filled, self-lubricating, moisture-repellent material with resistivity levels in the 10⁵ - 10⁹ range. This material has the highest impact strength, is lightweight, has excellent abrasion resistance, and possesses good chemical and stress-crack resistance.

The following physical property information is based on typical values of the resin.

Westlake Product Bulletin

Applications Include:

- Metal replacement components
- · Bulk material handling equipment
- · Weigh/fill equipment components
- Hopper/chute linings
- · Explosives handling equipment

Advantages of Lennite CN-P and SD-P:

- · Low carbon loading (slough resistant)
- Self lubricating (low coefficient of friction)
- Excellent wear properties
- · Noise dampening properties
- · Exceptional abrasion resistance
- · Lightweight
- · Cost effective
- Very low temperature compatibility

Manufacturing Capabilities:

Sheet: $\frac{1}{8}$ to 4" thick

Colors/Grades:

CN-P—Black SD-P—Black

*In addition to our standard capabilities, Westlake also has the ability to process custom resins in various sizes and colors with some exceptions.
